1 Product general information

1.1 Functional description

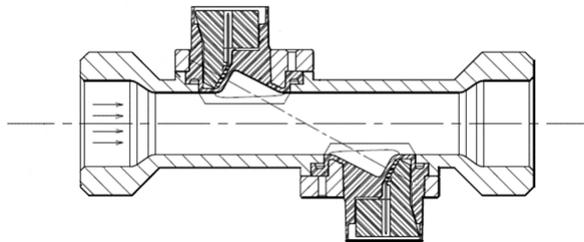

1.1.1.1 Application

The INTEGRA METERING water meter are based on the ultrasonic technology. It allows an accurate reading of the water consumption.

Because of the free pipe mechanical design, the accuracy of the measure is not affected by any suspended solids in water like sand or other sediments all along the product lifetime.

The water meter can be installed in any environment. For a walk by drive by reading the Wireless M-BUS versions exist in Open Metering Standard V4 compliant. For more drastic environment the Wired M-BUS version Open Metering Standard V4 compliant allows the device to be installed in industrial environment.

1.1.1.2 Measure principle

The measurement principle is based on the difference of time of flight between the two transducers. A transducer is a sensing element which convert the physical dimension (acoustic wave) into an analog signal. The transducer contains a piezoelectric element. This element behaves like a microphone: with an electrical excitation, an acoustic wave is produced across the pipe through the water at the sound velocity plus the water speed (downstream). The other transducer behaves like a speaker. It will generate afterward the same signal which will have the sound velocity reduced by the water speed (upstream). The flow rate is calculated from these raw quantities using several parameters which are to be adjusted during the calibration.

1.2 Technical data

1.2.1 Technical measurement data and dimensions

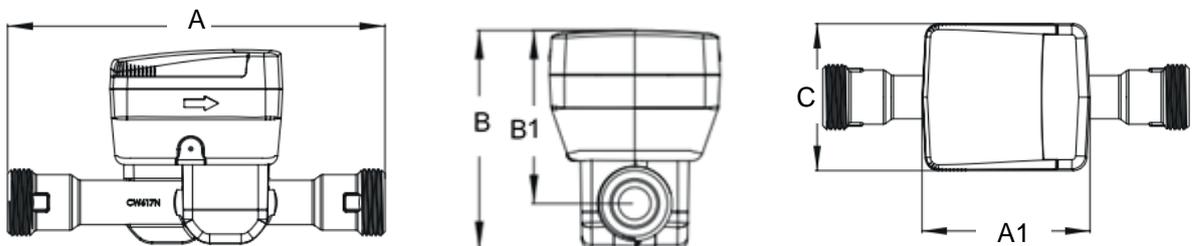

Table of dimensions in next page.

	Unit of measure	Diameter DN (mm)						
		15	15	20	25	32	40	50
Nominal flow Q3	m ³ /h	2.5	2.5	4	6.3/10	10	16	25
Maximum flow Q4	m ³ /h	3.125	3.125	5	7.9/12.5	12.5	20	31.25
Transition flow Q2	L/h	8	8	12.8	21/32	32	51.2	80
Minimum flow Q1	L/h	5	5	8	13/20	20	32	50
Starting Flow	L/h	2.5	2.5	4	6/10	10	16	25
Ratio Q3/Q1	-	500	500	500	500	500	500	500
Total length (A)	mm	110	165	190	260	260	300	300
Height (B1)	mm	77	77	77	77	77	77	77
Total Height (B)	mm	98	98	98	98	101	107	115
Width (C)	mm	76	76	76	76	76	76	76
Housing Length (A1) (mm)	mm	87	87	87	87	87	87	87
Weight (kg)	kg	0.8	0.9	1	1.4	1.5	1.9	2.4
Thread	-	G3/4"B	G3/4"B	G1"B	G1 ¼"B	G1 ½"B	G2"B	G2 ½"B

1.2.2 Power supply

Battery powered	Standard: 3.6 VDC lithium batterie, not replaceable
Lifetime	16 years minimum

1.2.3 Storage conditions

Storage temperature	from -20°C to +70°C (max. 4 weeks with T>35°C)
	from -13°F to +158°F (max. 4 weeks with T>95°F)

1.2.4 Operating conditions

Nominal pressure	PN 16	
Protection class	IP 68	
Medium	potable water	
Metrological class	Class 2	
Medium temperature	from 0.1°C to +50°C	from 32°F to +122°F
Environment temperature	from 1°C to +70°C	from 34°F to +158°F
Environment class	B (Indoor installation) / O (Outdoor installation)	
Mechanical class	M1	
Electromagnetic class	E2	
Sensitivity	U0D0	
Flow Measurement	bi-directional	

1.2.5 Technical data display

Display indication	LCD 10 digits
Units	m3, L, hour, min, sec
Value display	Volume, Flow, Reverse flow, Display test, Events and alarms status, F/W version
Events codes and alarms	Reverse flow, Low battery, Leakage, Air bubbles, Burst, Frost, Heat, Dry, Over temperature, No consumption

1.2.6 Communication interfaces

Wireless communication	NFC (configuration) Wireless M-BUS 868MHz
------------------------	--

1.3 Mechanical design

The meter is composed of:

- The hydraulic part: the free pipe housing in brass material with the two ultrasonic transducers
- The electronics: two electrical circuit boards:
 - The measurement PCBA which make the interface between the transducers and the meter microcontroller.
 - The user PCBA: It is the interface between the hydraulic part and the user. It collects all the information of the measurement PCBA, manage the storage in a datalogger, displays them on the LCD display. The user PCBA manages all the communication protocols like the NFC (Near Field Communication), the wired-MBUS, the wireless-MBUS or the pulse output.
- The housing: The device is IP68 compliant. It is fully potted to protect from humidity, moisture and dust and tampering. It makes the product reliable all along the lifetime.

1.4 Materials

1.4.1 TOPAS components in contact with the medium

Coupling housing	Lead free brass, material CW617N, compliant to ISO 228-1 for screw thread.
Transducers	Ultem resin, 2300 PW (drinking water compliant)
O-RING	EPDM

1.4.2 Other components

Plastic parts	Polycarbonate, UV resistant
---------------	-----------------------------

Poznámka:
Remarks:

Podkladom na vystavenie tohto certifikátu boli výsledky posúdenia a zistení vykonaných v súlade s postupom stanoveným v prílohe č. 2, Modul D, nariadenia vlády Slovenskej republiky č. 145/2016 Z. z. o sprístupňovaní meradiel na trhu, uvedené v správe č. NO-320/19/D/R.

System kvality výrobcu je periodicky preverovaný v súlade s prílohou č. 2, Modul D, nariadenia vlády Slovenskej republiky č. 145/2016 Z. z. o sprístupňovaní meradiel na trhu.

Výrobca je oprávnený umiestniť na meradlá vyrábané v súlade so schváleným systémom kvality identifikačný kód notifikovanej osoby 1781. Zásady používania certifikátu sú stanovené v dohode č. NO-320/19/D/A.

The results of appraisal and findings carried out in accordance with Annex II, Module D, Directive 2014/32/EU of the European Parliament and Council, are recorded in Report No. NO-320/19/D/R, with represent the base of issuing of this certificate.

The quality system of manufacturer is under permanent surveillance according to Annex II, Module D, of the Directive 2014/32/EU of the European Parliament and Council.

The manufacturer is entitled to provide for the measuring instruments produced within the scope of this approved quality system the notified body identification number 1781. The principle of the use of certificate is given in agreement No. NO-320/19/D/A.

CERTIFIKÁT EÚ SKÚŠKY TYPU

EU – type examination certificate

Číslo dokumentu: <i>Document number:</i>	SK 17-MI001-SMU052 Revízia 4 nahrádza certifikát zo dňa 8. novembra 2019 <i>Revision 4 replaces the certificate issued by November 8, 2019</i>	Revízia 4 <i>Revision 4</i>

EU DECLARATION OF CONFORMITY

Model: **TOPAS Sonic water meter**

Type designation: **TSO**

We,

INTEGRA METERING
12 rue FontGrasse
31700 Blagnac, France

declare under our sole responsibility the product listed above consistent with the type described in the certificate No. **SK17-MI001-SMU052-rev 3** (issued November 8th, 2019 valid until September 28th, 2027 approved by the Notified body 1781 Slovak Institute of Metrology in accordance with **Directive 2014/32/EU Annex II, Module B**).

The quality system for production, final product inspection and testing of the **water meters (MI-001)** was approved by the Notified body 1781 Slovak Institute of Metrology in accordance with **Directive 2014/32/EU Annex II, Module D**, under Certificate No. **SK 19-QD-SMU020** (issued August 20th, 2019 and valid until August 20th, 2022).

The object of the declaration described above is in conformity with the essential requirements of:

- **Directive 2014/32/EU** on Measuring instrument
- **Directive 2014/30/EU** on Electromagnetic compatibility
- **Directive 2014/53/EU** on Radio equipment
- **Directive 2014/35/EU** on Low voltage electrical equipment.
- **Directive (EU) 2015/863 of 31 March 2015 amending Annex II to Directive 2011/65/EU** on restriction of use of certain hazardous substances in electrical and electronic equipment (RoHS III)
- **Directive 1907/2006** on Registration, Evaluation, Authorization and Restriction of Chemical (REACH)

and harmonized standards and normative documents

- **ISO4064-1:2014** : Water meters for cold potable and hot water – Part 1: Metrological and technical requirements.
- **ISO4064-2:2014** : Water meters for cold potable and hot water – Part 2: Tests method
- **OIML R49-1:2013**: Water meters intended for the metering of cold potable water and hot water. Part1: Metrological and technical requirements
- **OIML R49-2:2013**: Water meters intended for the metering of cold potable water and hot water. Part 2: Test methods.

2 Product Design

2.1 Product Marking

2.2 Datamatrix

Marking includes a datamatrix that contains the serial number in text format. Integra Metering uses a serial number based on the SPDE standard (ANFAGUA document). It is constructed as follows:

Y	1	8	T	A	1	2	3	4	5	6
L1	F1	F2	L2	L3	F3	F4	F5	F6	F7	F8
1	2		3	4	5					

1	Manufacturer ID	INTEGRA METERING	Y		
2	Year of manufacture	Last 2 digits of the year			
3	Product family	RUBIN SONIC	R		
		TOPAS SONIC	T		
4	Diameter	15 mm	A	65 mm	G
		20 mm	B	80 mm	H
		25 mm	C	100 mm	Y
		30/32 mm	D	125 mm	J
		40 mm	E	150 mm	K
		50 mm	F	200 mm	L
5	Incremental number	Based on 6 digits - Numbering range / product			
		000000 -> 299999	SD Water meters		

3 Communication protocol

3.1 Near Field Communication

The near field communication (NFC) interface is used to communicate with the device. During the assembly, it is used for pushing data from the meter to the database, programming and calibrate the device. When installed, the user can get some data from NFC using the ParamApp application. Due to the self-powering of this interface, when meter has no more power, last information can be read through this interface.

3.1 Wireless M-BUS

The following Wireless M-Bus functionality which are part of the Wireless M-Bus specification or OMS V4 are stated to emphasize the requirement for M-Bus compatibility in typical TOPAS environments.

The meter built-in radio is compliant with OMS v4 (OMS v3 compatibility and uses the strictly synchronous transmission scheme.

3.1.1 Wireless emission modes

The meter built-in radio supports wireless M-Bus T1 mode :

- Unidirectional
- Short telegram
- Emission interval

3.1.2 Telegram emission interval

Mode	Default time interval (s)	Estimated lifetime (years)
T1	16 s	16 years

3.1.3 Supported frequencies

Band	868Mhz	
Mode	T	Unit
Frequency (uplink)	868,95	MHz
Frequency accuracy (uplink)	60	± ppm
Chip rate (uplink)	100	kchip/s
Chip rate tolerance (TX)	10 %	
FSK deviation for uplink (min/typ/max)	40/50/80	± kHz

3.1.4 Meter wireless MBUS address

The wireless MBUS address is the com-uid of the device.

3.1.5 Wireless MBUS security implementation

3.1.5.1 Encryption mode

The meter being compliant to both OMS v4 and v3 uses encryption mode 5 based on AES encoding (Cipher Block Chaining / 128 bits key / 16 bytes block size) and a 16 bytes dynamic initialization vector. This is equivalent to profile A. The key will be delivered separately.

3.1.5.2 AES Key

All meters share the same AES key.

3.1.5.3 Initialization vector for encryption mode

The initialization vector 5 is written in low to high order according to the AES standard FIPS 197:

LSB	1	2	3	4	5	6	7	8	9	10	11	12	13	14	MSB	
Manuf. ID		Meter ID				Version	Dev. type	Acc #	Acc #
LSB	MSB	LSB	MSB			Acc# is repeated 8 times								

e.g.: Water meter (device type: 07h) with ID 12345678 (BCD) / Manufacturer IMT (25B4h)

Header abstract is :

Manuf. ID		Meter ID				Version	Dev.type		Acc. #				
B4	25	78	56	34	12	10	07	7A	02	00	30	05	

Initialization vector is :

LSB	1	2	3	4	5	6	7	8	9	10	11	12	13	14	MSB
B4	25	78	56	34	12	10	07	02	02	02	02	02	02	02	02

3.1.6 Wireless telegram

3.1.6.1 Telegram definition

Following explanation shows the build of the wireless telegram (T1) with AES encryption (128 bit key). The format is defined by the EN13757-4.

The frame is splites in three parts: the datalink layer, the transport layer and the application layer:

3.1.6.1.1 Datalink layer

Overflow alarm: The alarm is triggered immediately when the flow is over 125% of Q3. The alarm is rest immediately after flow goes back below 125% of Q3 threshold.

4 Operation

4.1 LCD display

To show the meter's data, various windows have been created as functions that can display the assigned system information.

4.2 Display symbols

The symbols are defined as follows:

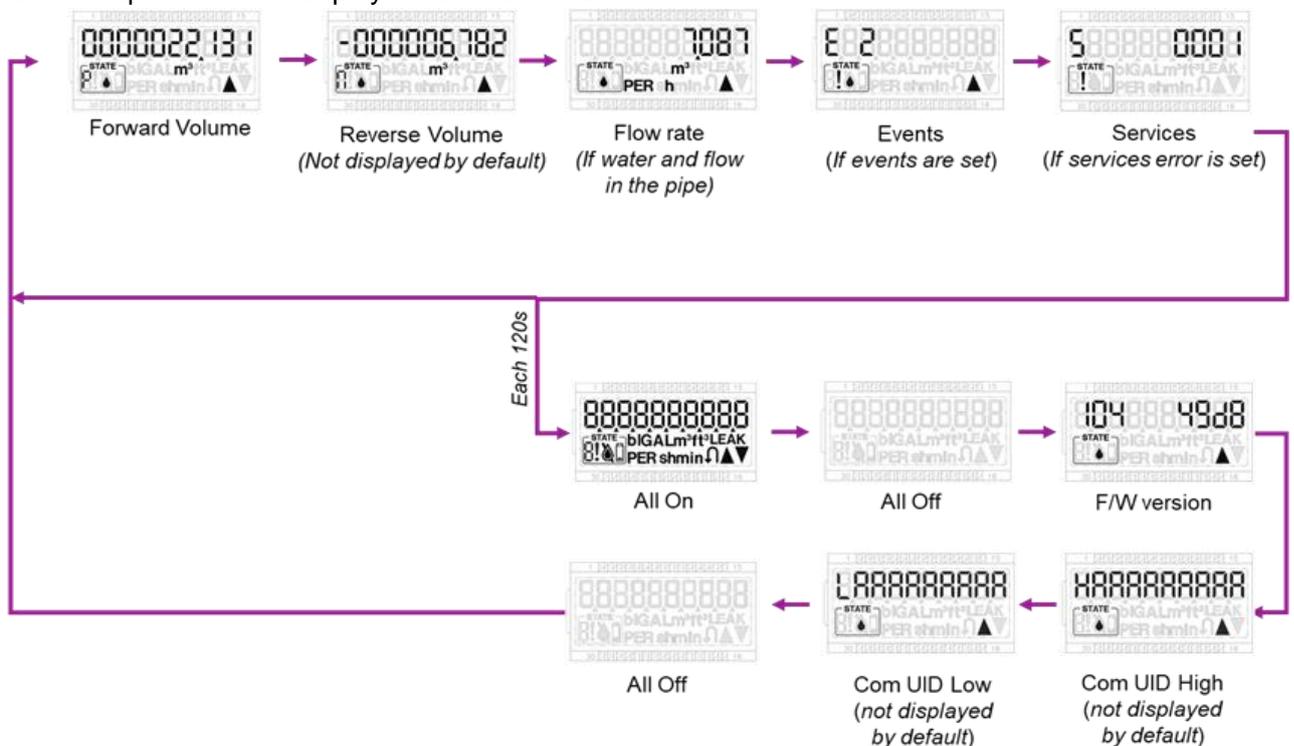

Flow direction		Positive flow	Set when: <ul style="list-style-type: none"> • There is water in the pipe • The flow is over Q_{start}
		Reverse flow	Set when: <ul style="list-style-type: none"> • There is water in the pipe • The flow is below $-Q_{start}$
Index indicator		Positive Index	Set when the window displays the positive index (forward volume)
		Negative Index	Set when the window displays the negative index
Water detection		Wet	The wet symbol indicates that water is present in the pipe.
		Dry	The dry symbol is set when air is detected after 10 consecutive measurement timeouts. It is reset as soon as water is detected in the pipe.
Reverse flow		ON	The reverse flow indicator is set when the average flow rate over 15 min is below -2.5% of Q_3
		OFF	The reverse flow indicator is reset when no reverse flow is detected for 30 days
Leakage	LEAK	ON	The leak indicator is set when the flow is greater than the threshold (1% of Q_3) during 24 consecutive hours
		OFF	The leak indicator is reset when the flow goes below the threshold.
Exclamation mark		ON	The exclamation mark is set when following events occur: <ul style="list-style-type: none"> • Air bubbles

			<ul style="list-style-type: none"> Burst Over temperature No consumption <p>In case of service error, the exclamation mark is also set.</p>
		OFF	The exclamation mark is cleared when the concerned event is reset every round hour.
Low battery		ON	The low battery symbol is set when the expected remaining battery life is below 18 months. The symbol is off otherwise.
Test mode		ON	The test mode symbol is set to indicate that the flowmeter is in test mode operation. It is reset as soon as the verification mode is over. Please contact the service for further information.
Sleep Mode		ON	Before the first installation, the display is blank. Normal display operation starts when water is detected in the pipe or NFC communication is initiated.

4.3 Display loop

The LCD window changes automatically to display the following information: forward volume, reverse volume, flow rate, events, firmware version, flow direction, meter state.

The basic sequence of the display is defined as follows:

4.4 Events (visual indication on the LCD)

This summary shows all possible events which require attention by the user.

Display code	Events	Conditions	
E1	RESERVED		
E2	Air bubbles	ON	If air is detected in the pipe
		OFF	Alarm is reset after 1 hour without air detected in the pipe
E3	Burst	ON	Actual flow rate over 25% of Q_3 value for more than 30 minutes
		OFF	Actual flow rate is below 25% of Q_3
E4	RESERVED		
E7	Over temperature	ON	If ambient temperature > threshold (60 °C)
		OFF	Reset after 1 hour if ambient temperature < threshold (60 °C)
E8	No consumption	ON	If average flow rate is below 0.1% of Q_3 for more than 3 days
		OFF	If flow rate greater than 0.1% of Q_3
S	Service	Please contact the service	

4.5 Services errors description

Display code	Events	Conditions
S 0001	Service	The metrology unit is not working permanently.
S 0002	Service	Temporary communication error between metrology unit and microcontroller.

S	Decimal	Hexadecimal	Binary
Defective meter	1	0x 0001	0000 0000 0000 0001
Temporary communication error	2	0x 0002	0000 0000 0000 0010

Note: In case of software error, the service error S0002 is displayed after 30s and the bit 3 of the Status register of the transport layer is set. After 9 minutes, the service error S0001 is displayed.

4.6 Run modes

4.6.1 User mode

This is the default run mode of the meter.

Function	Default
----------	---------

Displayed values		Forward volume (10 sec)
		Flow rate (2sec)
		Events, Status (2 sec)
Led		OFF
Radio		ON if any
Radio emission interval		16s
Unit	Volume	m3
	Flow	m3/h
Resolution	Volume	3 digits after comma
	Flow	2 digits after comma
Mode time out		n/a

4.6.2 Test mode

This mode is set by authorized person for specific test on verification bench at Partners / Customers using ParamAPP Android application.

This mode is active for a defined period of time after this period the meter switches automatically to the “user mode”.

Function		Default
Displayed values		Forward volume (10 sec)
		Flow rate (2 sec)
		Events/status (2 sec)
Led		On (pulse)
		Pulse weight: 10mL/pulse
Radio		On if any
Radio emission interval		16s
Unit	Volume	m3
	Flow	L/h
Resolution	Volume	3 digits after comma
	Flow	3 digits after comma
Mode time out		8 hours

4.6.3 Sleep mode

This mode is used when the device is in storage.

The water meter switches back to “user mode” instantaneously when seing water or using ParamAPP android application.

Function		Default
Displayed values		Empty
Led		OFF
Radio		OFF
Radio emission interval		OFF
Unit	Volume	N.A.
	Flow	N.A.
Resolution	Volume	N.A.
	Flow	N.A.
Mode time out		N.A.

4.7 Data

4.7.1 Volume

The forward volume and the reverse volume are computed and available for users (display, storage, digital output).

- The volume is incremented when the measured flow rate exceeds Q_{start} .
- The volume is computed normally even if the flow rate exceeds Q_4 (limited by cavitation)

Both volumes can be displayed :

- Default unit is cubic meters (m^3)
- The resolution is 3 decimals after point by default

4.7.2 Flow rate

The instant flow rate is computed through the 1Hz sampling measurement (when in user mode)
The flow rate is available for users in a signed format (display, storage, digital output).

- The flow rate is computed for both forward and reverse flow
- When flow $< Q_{start}$: no flow rate value is displayed
- The Min flow is computed every round hour
- The Max flow is computed every round hour

The flow rate can be displayed :

- Default unit is cubic meters per hour (m^3/h)
- The resolution is 3 decimals after point by default

4.7.3 Operating hours

The cumulated Operating hours are computed and available for users (storage, digital output)
The cumulated time during which an or multiple errors are raised are logged in the Error hours counter.

4.7.4 Water temperature ($<50^\circ C$)

The instant water temperature is computed on 1Hz sampling base.
The water temperature is available :

- In the following units : $1/10^\circ C$

5 Shipping information

5.1 Unit shipment and ordering information

5.1.1 Unit cardboard box

5.1.1.1 Dimensions

Reference	Unit Weight	Cardboard dimensions
TSMR-015-AXT-W8-INTG01	0.96 Kg	155 x 160 x 100 mm
TSMR-015-BXT-W8-INTG01	1.1 Kg	202 x 150 x 99 mm
TSMR-015-CXT-W8-INTG01	1.1 Kg	202 x 150 x 99 mm
TSMR-020-AXT-W8-INTG01	1.1 Kg	202 x 150 x 99 mm
TSMR-025-AXT-W8-INTG01	1.5 Kg	338 x 140 x 114 mm
TSMR-032-AXT-W8-INTG01	1.6 Kg	338 x 140 x 114 mm
TSMR-040-AXT-W8-INTG01	2.1 Kg	338 x 140 x 114 mm
TSMR-050-AXT-W8-INTG01	2.7 Kg	338 x 140 x 114 mm

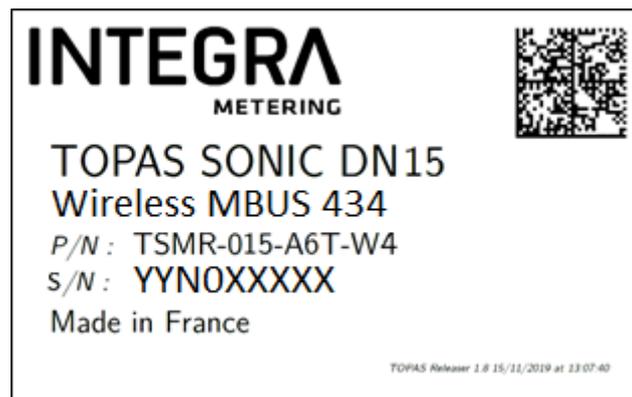

5.1.1.2 Contents

The box contains:

- A water meter

5.1.1.3 Unit cardboard box identification label

Unit identification will be placed on the unitary cardboard with SN. The cardboard is labeled as follows:

The label will be stuck in a way that when the unit handling is open, the unitary label is visible.

5.2 Palletization

5.2.1.1 Pallet details

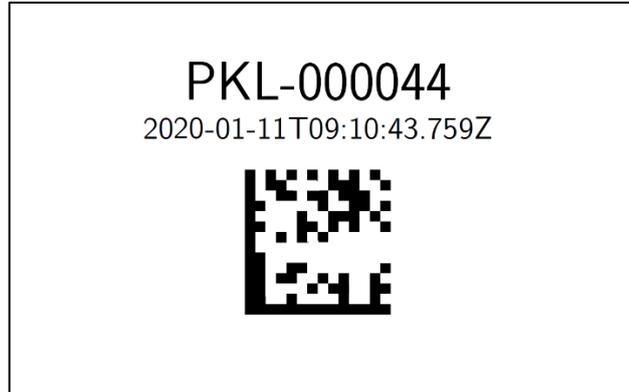

The pallet "Europe Format" will be used. The wood used for the pallet will be compliant with NIMP 15 /ISMP 15. The cargo is maintained by cardboard bracket.

Pallet max weight (including pallet): 1000 Kg

5.2.1.2 Handling unit description

The handling unit dimensions are: 120(L)x80x90(H)cm.

The pallet is labelled with the following sticker:

5.2.1.3 Dangerous goods specifics

The meter containing Lithium-Ion battery with a power over 20Wh falls into Class 9 (Miscellaneous) hazardous materials category.

This requires to:

- Fill a "Shipper's declaration for dangerous goods"
 - o This declaration form is filled and signed by authorized personnel from Integra Metering
 - o Lists exact description of shipment conditioning

SHIPPER'S DECLARATION FOR DANGEROUS GOODS	
Shipper INTEGRA METERING SAS 12 RUE FONT-GRASSE 31700 BLAGNAC FRANCE	Air Waybill No. Page 1 of 1 pages Shipper's Reference number
Consignee	
Two completed and signed copies of this Declaration must be handed to the operator.	
TRANSPORT DETAILS This shipment is within the limitations prescribed for: (delete non-applicable) PASSENGER AND CARGO AIRCRAFT Airport of Departure : Airport of Destination :	WARNING Failure to comply in all respects with the applicable Dangerous Goods Regulations may be in breach of the applicable law, subject to legal penalties. Shipment type: (delete non-applicable) <input type="checkbox"/> NON-RADIOACTIVE <input checked="" type="checkbox"/> #####
NATURE AND QUANTITY OF DANGEROUS GOODS UN Number or Identification Number, proper shipping name, Class or Division (subsidiary risk), packing group (if required) and all over required information. UN 3091, Lithium metal batteries contained in equipment, 9 // 2 FIBREBOARD BOXES x 0.60 kg // 970 UN 3091, Lithium metal batteries contained in equipment, 9 // 1 FIBREBOARD BOX x 0.30 kg // 970 Overpack used	
Additional Handling Information Emergency contact (24 - hour number) : +33 (0)5 67 76 81 09	
I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labelled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations. I declare that all of the applicable air transport requirements have been met.	Name/Title of Signatory Place and Date Signature (see warning above)

- Apply a label identifying the company and address from where the goods are shipped and the address of delivery. It identifies in addition the quantity of lithium present on the pallet.

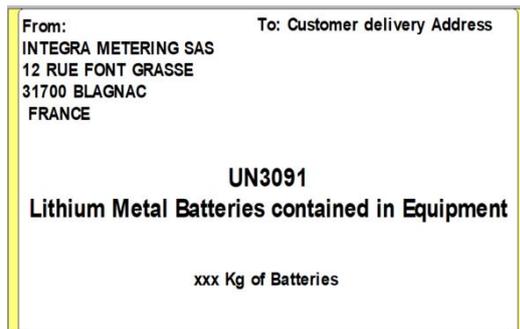

The label is designed as follows:

This label is applied on the film protecting the pallet.

- Apply a label identifying the company and address from where the goods are shipped and the address of delivery. It identifies in addition the quantity of lithium present on the pallet.

The label is designed as follows:

This label is applied on the handling unit.

- Apply a label identifying the hazardous materials category. The label is designed as follows:

This label is applied on the handling unit.

The transporter has to be compliant with dangerous goods.
